

### **OBJECTIVE**

#### 2-4 PLAYERS - 30 MINUTES

Everyone knows that capybaras love a nice cup of coffee, a delicious snack, and a comfortable place to enjoy them! Build the coziest café to make your capybara customers happy and score the most \*\*points!

### **CONTENTS**

#### 83 CAFÉ CARDS

# 12 SPECIAL GUEST CARDS

## 4 COUNTER CARDS

# **COIN TOKENS**Make change as needed.

×25

#### **SETUP**

- Shuffle the Café cards into a facedown deck in the center of the play area; reveal four into a face-up display beside the deck. Leave room for a discard pile beside the deck.
- Shuffle the Special Guest cards and deal one per player plus one more face up near the display; return the rest to the box.
- **3** Make a supply of **Coins**.

- ◆ Each player takes seven Coins, draws four Café cards from the deck to form their hand (keep your hand secret), and chooses a Counter card to place on the table in front of themself, beginning their café.
- **6** Choose a start player; we recommend the player that can balance an orange on their snout the longest, but any method will do. The game begins with the starting player's turn!

### **ON YOUR TURN**

Choose one card from your hand, and either **Add** it to your café, or **Serve** its *customer*. Then **Refill** your hand from the display, and play passes to the next player clockwise.

## **UNDERSTANDING THE CAFÉ CARDS**

Each card is **two things at once**: The **top** part is something you can add to your café to make customers happier. The chalkboard on the **bottom** part represents a customer visiting your café. You will use each card as one thing or the other, never both. *Which one* is up to you!

## **ADDING**

Pay the card's **cost** (*by spending Coins into the supply*), and add it to your café, forming a horizontal row.

If the card has any **action text**, follow its instructions (any action that bestows an **ongoing** effect is indicated by a  $\bigotimes$  symbol).

## The banner on the top left indicates what kind of addition the card is.

#### FOOD

The banner shows something to eat or drink that your café provides.

#### DECOR

The banner shows a type of decor that your café features. Your café can include multiple different types. You need decor to gain regulars (see Gaining Regulars on page 7).

RUSTIC

#### **EQUIPMENT**

These cards don't provide food or decor, but they offer a variety of special actions and/or scoring opportunities.

As the game goes on, you'll continue adding cards to your row. Develop your café so that it features a winning blend of food, decor, and equipment!

## **SERVING**

The customer chalkboard displays the type of **foods** the customer wants, and (usually) their preferred **decor**. Gain (1) (from the supply) for each desired **food** that your café provides (notice that your café begins the game providing the Tea and Coffee found on your Counter card).

- Customers **don't** want **specific** foods from their desired types. *For example, a customer that wants a Snack will be happy with* **any** *Snack-type food.*
- If a customer wants two of the same food, you **can't** satisfy both with just one matching symbol.
- Some customers want **multiple Coffees**. Your café must provide that many Coffees in order to fulfill that desire, but it still only counts as a single food served, earning 1.

- You may serve a customer that would earn you zero Coins (because you can't provide anything they want); in some rare situations this might actually be your only option on your turn.
- Decor symbols do not earn Coins even if you match them; foods only.

For example, this customer wants any two Coffees, any Drink, and any Snack. You have two Coffees and a Snack in your café (but no Drink), so you earn 2.

When you serve a customer, discard the card into the shared discard pile.... **unless** it has become a *regular* (*see next page*).

## **SPECIAL GUESTS**

At any point **on your turn** if your café meets the desires of any of the remaining *Special Guests*, claim that card and keep it in your playing area. This is a free action **in addition to** all the normal activities on your turn. Each Special Guest provides a nice scoring bonus.

For example, the first one with two **Snacks** in their café can claim the Big Eater!

#### **GAINING REGULARS**

If you serve a customer **every food** it wants **and** your café has **at least one instance of the customer's preferred decor**, tuck it under your Counter card with just the chalkboard showing; this customer has become a **regular** and will score you at the end of the game.

• Customers without a preferred decor can never become regulars.

#### REFILLING

Refill your hand to **four** cards by taking cards of your choice from the display. Then fill each gap in the display with a new card drawn from the deck; your turn is now over. If the deck ever runs out, shuffle the discard pile to form a new deck.

#### **GAME END**

If during your turn you gained your **third Regular** (*fourth* in a two player game) and/or you claimed the **last Special Guest**, the game end is triggered. Each **other** player gets one more full turn, and then the game ends.

Tally your scores for the following items (a pen and paper will be helpful):

for every **two Coins** you have, rounding down.

Each **Café card** displays a score value. While many have a fixed value, some of them describe conditions that will affect their score value.

for each **regular** you have tucked under your Counter card.

for each Special Guest that you claimed.

The player with the highest score has the happiest capybara customers, and wins! *If it's a tie, share the win!*
